## About the Workshop

***“If you keep doing the same thing, you will keep getting the same results”.***

This is a day to commit to enjoying yourself, exploring your options for the future and setting yourself up for 2012 by creating New Year Resolutions that work.

Explore and open up to new possibilities within your life and, most importantly, steps to creating a pathway of success – whatever ‘success’ means to you.

This is an opportunity to stretch a little, to receive useful information, and enjoy simple, creative exercises that can help you discover fresh ideas, keys and inspiration.

You will not be asked to be on a stage or to perform!

The value of creativity is that it helps us access resources and ideas that may not be found with a logical approach alone.

By the end of the day, you will be supported to consolidate practical, achievable steps towards your goals.
